DOT Tech

Company Profile

DOT Tech | 2026

Company Name

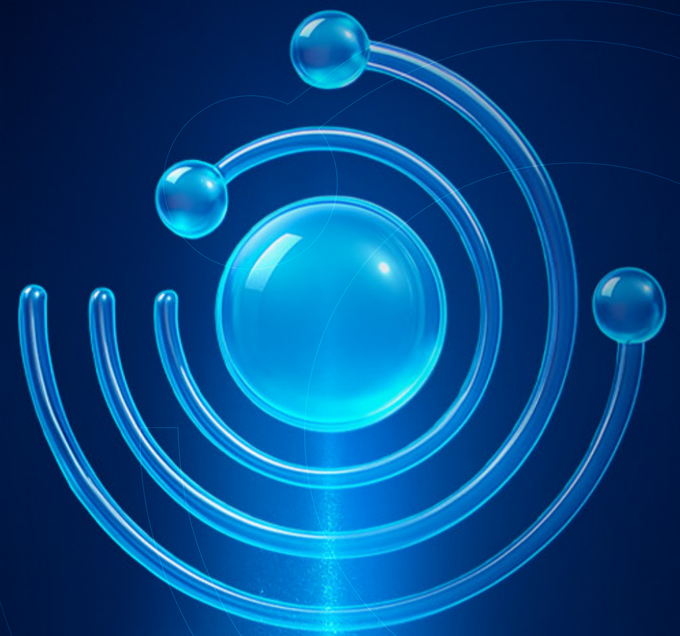

The name comes from the word “Dot” which symbolizes the digital point in the world of technology, and “Tech” which stands for technology. The name reflects the simplicity and clarity of the company’s identity, aiming to be the starting point for integrated and innovative digital solutions.

Logo & Branding

- The visual identity reflects modernity and professionalism, combining blue (trust & innovation) and gray (professionalism & neutrality).

- The logo integrates the concept of the “dot” with a modern technological touch.

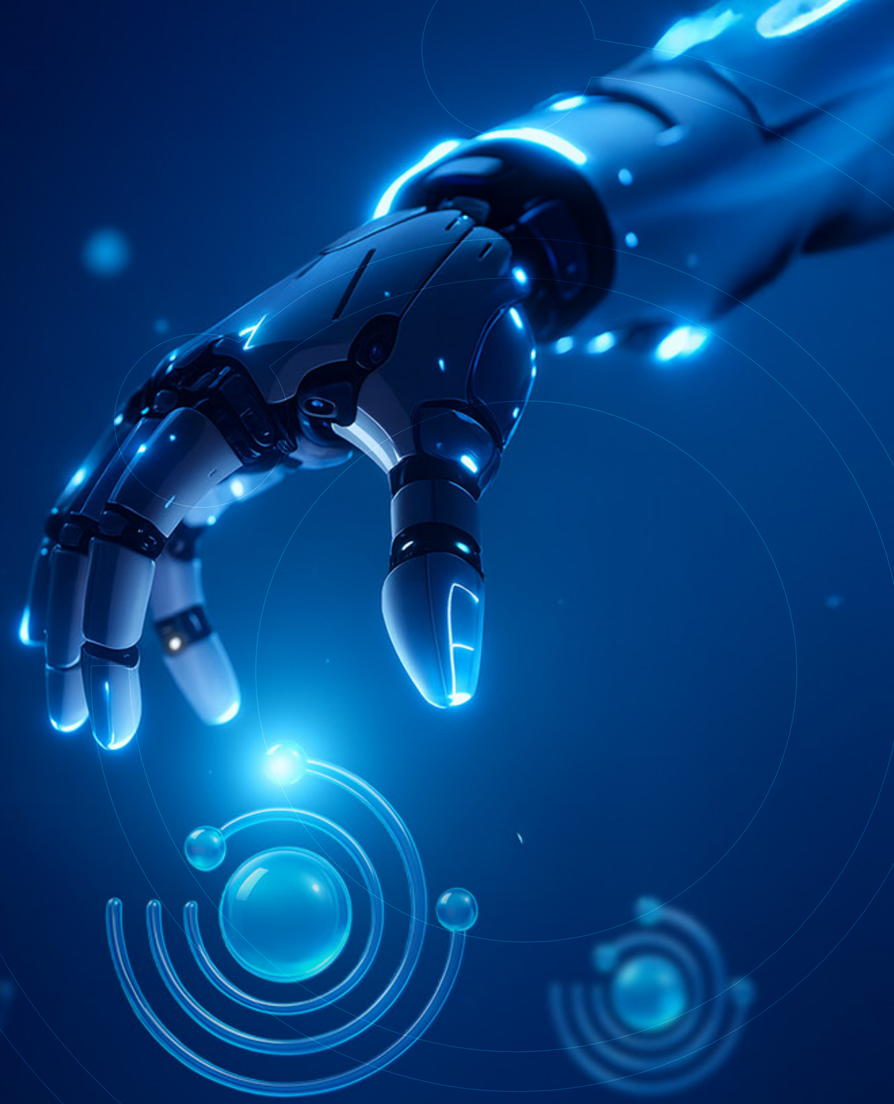

About Us

DotTech was founded as a startup specializing in software development and modern digital solutions.

The idea emerged to meet the market’s demand for flexible technology services that combine quality, speed, and innovation.

We offer a wide range of services including web development, mobile applications, customized systems (ERP/CRM), and UI/UX design.

What makes us unique is that we don’t only focus on coding, but also integrate advanced technical expertise with our strategic partner in media and marketing (DotMedia), to provide clients with a complete solution from development to marketing.

Vision & Mission

Vision: To become one of the leading digital solution providers in the region, creating future-ready products with global competitiveness.

Mission: We help businesses and individuals transform their ideas into fully integrated digital realities, through innovative and effective solutions, with a commitment to quality and on-time delivery.
